VisionGauge®
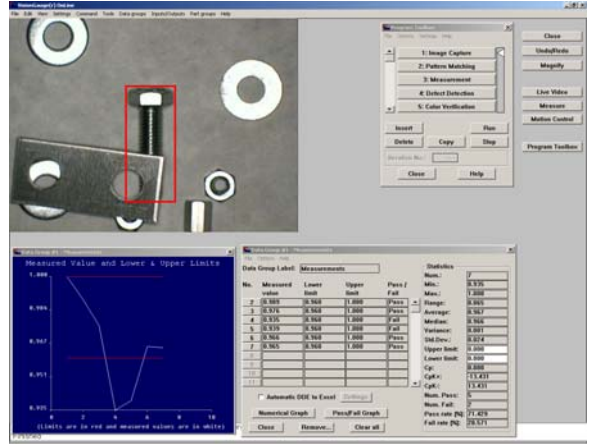

VisionGauge®/ Smart Camera Bundle

The VisionGauge® / Smart Camera Bundles are complete, all-in-one solutions for both imaging and machine vision applications. They include either the VisionGauge® or VisionGauge® OnLine software package as well as a Sony Smart Camera, a self-contained unit that includes a camera and PC that runs the Windows® XPe operating system.

The VisionGauge® / Smart Camera Bundles come with everything fully installed and configured and are ready to run right away. They include all of VisionGauge's® powerful software tools. And because of VisionGauge's® simple and intuitive interface, they are extremely easy to setup and use.

The VisionGauge® / Smart Camera Bundles are perfectly suited for a wide range of applications including industrial, imaging, microscopy, image analysis, machine vision and quality control.

VisionGauge's® intuitive Windows® interface is simple and easy to use.

You can connect a monitor, mouse, keyboard & network directly into the back of the camera
